# SYMPAAN

About Us

My school is an application which is used by different kind of school for different purpose. The main purpose of this app is to be strong communication between teachers, students & parents. Despite of their busy schedule, parents can communicate with teachers or management from anywhere. Moreover, it helps in supporting and improving the overall performance of the students.

This application would include student assignment, attendance, Exam schedule, Time table, syllabus, announcement etc. This application is a combination of web app & mobile app. This will be managed by school & admin. The mobile app is android. In this application, web app is used for teacher, admin, and student. The mobile app is used for student only. In mobile application, PWA format is used.

In this App, Student will be our primary users. Student and their parents will use this app to view their assignments, exam schedule, time table, syllabus, special messages like announcements, circular etc. They can submit their home assignments also.

This Product should allow teachers to log in and see their student's progress, monitor their activities, and ensure they're on track. So list Teacher as the next user.
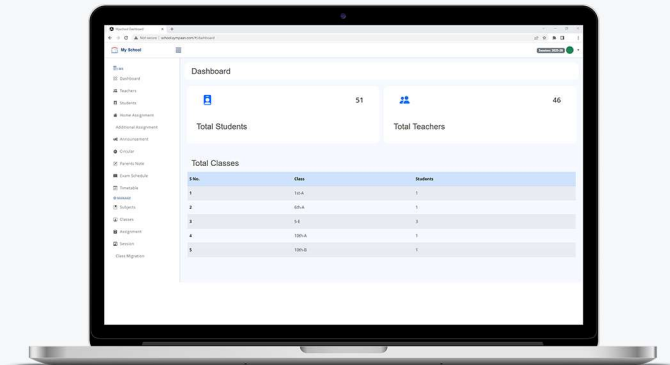

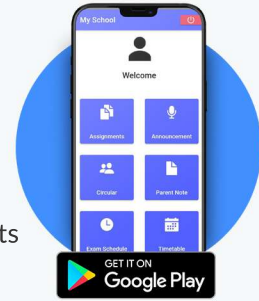

Admin will play important role in this app. The role of admin is to access reports, list of users, teachers. He will configure and manage student assignments, announcements, subjects, classes, circulars, parent note, and exam schedule. To do these, he must be login.

Key features of the application:
Myschool

FOR ADMIN & TEACHER
